## HEAVY DUTY SCRUB PAD

### Description

The Heavy Duty Scrub Pad is constructed of a heavy duty artificial turf material for exceptional cleaning performance and long life. It works like a brush with the convenience of a pad.

### Directions for use

This pad is ideal to use with standard speed floor machines, automatic scrubbers and oscillating floor machines. It is ideal for use on a variety of floors, including: concrete, terrazzo, deep grouted tile and other uneven surfaces.

### Construction

The Heavy Duty Scrub Pad is constructed of a heavy duty artificial turf surface that is sewn with high tensile thread onto a porous, nonwoven backing pad. The pads are not laminated. This allows for the unobstructed flow of water or cleaning solution when using an auto scrubber. With no serged borders, these pads provide edge-to-edge cleaning power without damaging baseboards or walls.

### Product care

The pad should be thoroughly cleaned after each use to prolong its life and efficiency. Flush out dirt and debris with a high pressure garden hose. Use hot water if available. To dry, stand the pad on its edge and prop against a wall or rack. This allows the water to completely drain from the pad and promotes faster drying. Do not use commercial washing machines or dryers.

### "Green" initiative

- No harsh chemicals needed.
- Cleans with water or neutral cleaning solutions.

### Features/Benefits

This pad is used to get down into the cracks and crevices of uneven floor surfaces and clean deep grout lines for unsurpassed cleaning results. Ideal for use with machine speeds up to 500 rpm.

### Specifications

V01768: 20" dia

V01769: 14" x 20"

Thickness: 1.30"

Weight: 74 oz

Fiber type: Heavy duty artificial turf  
sewn with high tensile thread to a  
nonwoven web

Binder system: Cross-linkable,  
water-based

Binder application: n/a

Abrasive application: n/a

Abrasive: n/a

Color: Dark green

### Packaging

4/Case
