CITRUS MANGO AIR FRESHENER

Description

A new technology air freshener that interacts and eliminates malodors from the air and fabrics. The product meets all federal and state VOC compliance requirements. The air freshener attacks airborne odors instantly, neutralizes and then evaporates prior to falling to the floor. The product is safe to use on most fabrics such as drapes, upholstery, carpeting and bedspreads to eliminate odors that are trapped in the fabrics. When using to deodorize fabrics, hold the can eighteen inches from the fabric and apply in short bursts eliminating the potential for fabric saturation.

Product directions

Shake can, align tip with black dot on the rim and hold 15" – 18" from the surface to be sprayed.

First aid

Important: Please make sure your employees read and understand the product label and Safety Data Sheet (SDS) before using this product. See the label for use directions and the SDS for hazard warnings, precautions, first aid, storage and handling data.
