## MELAMINE UTILITY PAD

### Description

This pad is made using the original BASF open-cell melamine foam, laminated to nonwoven material made of 100% recycled polyester fibers. The melamine pad works miraculously to clean floors without removing the floor finish. It is mainly used on shallow grouted floors, cleaning any heavily soiled floors, and is excellent for removing stubborn black marks.

### Directions for use

- The incredible cleaning properties of melamine foam creates an unusually high level of friction when introduced to the floor. It is important to add water, a neutral cleaning solution or a degreaser to both the floor pad and to the floor in order to reduce friction upon startup.
- Avoid rough, uneven surfaces which can wear out the pad quickly.

### Construction

This product is made of melamine foam laminated to a 100% recycled polyester nonwoven material, and will not be affected by water or neutral cleaners.

### Product care

To prolong life of this product, avoid rough, uneven surfaces and make sure pad and floor are always wet. Always saturate pad and floor before use.

### "Green" initiative

- The Melamine Utility Pad does not require the use of harsh chemicals.
- Laminated, nonwoven material is made with 100% recycled post-consumer polyester fibers.
- Melamine foam and nonwoven material are laminated together with a water-based, environmentally-friendly adhesive containing no harsh chemicals.

### Features/Benefits

This product is used for cleaning and restoring a variety of flooring: VCT (vinyl composite tile), terrazzo, ceramic and porcelain tiles, epoxy or concrete flooring.

### Specifications

Size: 4.5" x 10"

Thickness: 0.9"

Weight: 0.09 lb

Fiber type: Melamine

Lamination system: Water-based adhesive

Color: White

### Packaging

V02340: 20/Case (4 bags of 5)

Every application. Every time. [reliablebrand.com](http://reliablebrand.com) | 1 844-VERITIV
