## OVEN & GRILL CLEANER & DEGREASER

### Description

More effective than foaming products, this formulation quickly penetrates and removes stubborn baked-on carbon and soil. Most oven cleaners are designed to work by liquefying baked-on deposits so they can be rinsed or wiped away. Unfortunately, this usually requires several applications. This oven and grill cleaner was designed to penetrate the deposits and actually break the chemical bond, releasing the baked-on deposits from the oven surface. The result is fast and easy removal of stubborn baked-on food soils. This non-fuming product works fast and leaves a fresh fragrance behind.

### Product directions

For best results heat oven to approximately 200°F then turn off. Spray cleaner on warm oven. Allow the cleaner to do the work by remaining on the surface for two or more minutes. Wipe oven clean with a wet cloth or sponge. Heavily soiled items may require a second application. Stubborn spots may sometimes require the use of a scouring pad. Works slowly on cold surfaces. Apply as above and allow to work 5 – 30 minutes or until soil is softened. Wipe clean.

**Grills:** dilute with equal parts of water. Grill should be warm (approximately 180°F). Pour liberal amounts on grill and spread with a cloth or sponge. Wipe or scrape off grease. Thoroughly sponge surface with water to remove all residue.

Wipe dry. **Fat-fryers:** drain all grease from fryer. Rinse fryer with hot water to remove excess un-drained fat. Fill fryer with water to within 3 – 4 inches from top. Add 4 – 6 oz of cleaner to each gallon of water in fryer and boil slowly for 20 minutes. Turn off heat. Drain and rinse thoroughly. Brush off loosened carbon using long handled stiff bristle brush. Wipe pot surface with dry cloth.

**Note:** do not use on aluminum or painted surfaces. Never use on hot surface.

### First aid

**If inhaled,** remove victim to fresh air and keep at rest in a position comfortable for breathing. Immediately call a poison center or physician. **If swallowed,** immediately call a poison center or physician. Rinse mouth. Do not induce vomiting. **If on skin (or hair),** take off immediately all contaminated clothing. Rinse skin with water or shower. Wash contaminated clothing before reuse. Immediately call a poison center or physician. **If in eyes,** rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a poison center or physician.

### Application

Oven, fryer and grill

### Features/Benefits

Penetrates and removes baked-on deposits

Non-fuming

Nonflammable

Versatile: use on ovens, grills and range hoods

### Specifications

Color: Orange

Scent: Characteristic

pH: 12.9 – 14

Dilution: RTU

Density: 1.05

### Packaging

V01465: 4/1 gal
